

ACCREDIO

for Accreditation Agencies

Designed to automate and support your accreditation process lifecycle

The Solution

Accredio is a cloud-based UI framework that streamlines accreditation workflows to reduce operating costs and software licensing fees.

Automated Workflow

Reduced 3rd party software licensing costs

New insights with reports and analytics

Higher quality and more timely results

Optimal User Experience

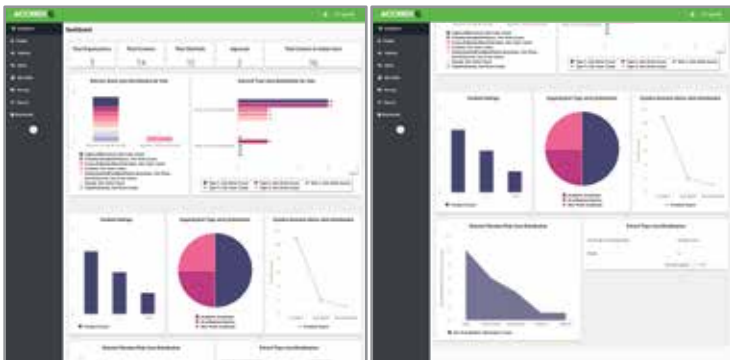

Use current infrastructure

Accredio can be deployed as a new system, or replace / upgrade your existing accreditation system. A modular approach leverages prior investments to reduce capital costs. Upgraded systems provide an enhanced user experience with deeper insights through analytics. Accredio is designed to automate your organization's accreditation workflow and supports: team selection, scheduling site visits, survey data collection and management, analysis and reporting, and managing accreditations.

Implement a new system

This software-as-a-service implementation delivers a seamless user experience. A hosted web application is maintained by ThoughtFocus with a shared private cloud-based framework under your organization's name. Simply login to Accredio with your credentials to use the application.

A modern UI enables a streamlined user experience with simple dashboards to monitor the process and gain insights with analytics. All UIs can be customized with your brand

Upgrade your existing system

Accredio can be used to extend your system's functionality based on needs and system requirements. Accredio is deployed to your on-premise servers / private cloud with upgrades and maintenance provided by your in-house IT team. Bug fixes or code changes are pushed to your servers by ThoughtFocus.

Replace your existing system

Replace your existing outgrown system while transferring the data present onto our cloud-based framework. We can also conduct a gap analysis on your existing system to plug and play Accredio components. ThoughtFocus builds the APIs and credentials for integration with existing apps. This adds new functionality while retaining the UI, UX and behavior of the old system.

Why choose Accredio

Security

- Inbuilt layer of security as the application runs on a cloud-based platform
- Strong encryption and token-based authentication access to prevent malicious activities
- Runs on secured network i.e. HTTPs which prevents data leaks
- Role based access permission to functionalities in the application
